SEC P vs NP — Wall atlas

Compiled 2026-05-21 12:07 UTC. 43 total barrier rejections logged.

This is the **map of known walls** encountered by the barrier filter. Each entry below was a proposed conjecture that, according to dual-LLM agreement, would fall to one of the four classical barriers. Patterns in this data tell us where the proposer keeps tripping.

Barrier-hit counts

Barrier	Rejections
ALGEBRIZATION	18
NATURAL_PROOFS	14
RELATIVIZATION	8
KARP_LIPTON	3

Rejections by field_A (top 10)

field_A	total	primary barrier
Abstract recursion theory	4	RELATIVIZATION
