SEC P vs NP — Dead frameworks compendium

Compiled 2026-04-28 17:55 UTC. 0 frameworks evaluated and rejected.

Every entry below is a structured mathematical framework that was proposed, elaborated into sub-conjectures, empirically tested, and failed to reach the PROMOTED threshold (fitness ≥ 0.30). These negative results are the **scientific core** of this research engine: they map out what does NOT work.

No dead frameworks yet — system still populating.
